Owen Mbeki

Site Reliability Engineer · Cape Town, South Africa · owen.mbeki@example.com

Summary

Site reliability engineer with ten years in operations, from racking servers to running Kubernetes for a payments company. I like boring, well-observed systems, clear runbooks and on-call rotations people don't dread. Strong on Kubernetes, Terraform and incident response.

Experience

Senior Site Reliability Engineer — Cloudnest · Mar 2021 - Present
- Run 14 Kubernetes clusters on EKS and GKE; everything in Terraform and Helm, delivered with Argo CD (GitOps).
- Monitoring with Prometheus and Grafana, traces with OpenTelemetry; defined SLOs and error budgets for 40 services.
- Incident commander in the on-call rotation; blameless postmortems; monthly chaos experiments.
- Capacity planning for peak season and FinOps work that cut the cloud bill by 23%.
- Secrets in HashiCorp Vault; Istio service mesh for mTLS between services.

DevOps Engineer — Hostlab · Jan 2018 - Feb 2021
- Configuration management with Ansible for 300 Linux servers (Ubuntu and RHEL); Bash scripting everywhere.
- Jenkins pipelines and Docker images for 20 teams; first workloads on AWS.
- Python automation for backups and certificate renewal; PostgreSQL operations and failover drills.

Systems Administrator — Coastal Insurance · Jun 2016 - Dec 2017
Windows Server and Active Directory administration, PowerShell scripts, office networking and VPNs.

Education

University of Cape Town, B.Sc. Computer Science (2012 - 2015)

Skills

Kubernetes, Terraform, Helm, Argo CD, Prometheus, Grafana, OpenTelemetry, Vault, Istio, Ansible, Jenkins, Docker, Linux, Bash, Python, AWS, GCP, PostgreSQL, PowerShell

Certifications

Certified Kubernetes Administrator (CKA), 2022
HashiCorp Certified: Terraform Associate, 2021
