Distributed Systems
Spring Boot
Apache Kafka

## Languages

Slovenian (Native or Bilingual)
English (Full Professional)
German (Limited Working)

## Certifications

AWS Certified Solutions Architect – Associate
Certified Kubernetes Application Developer (CKAD)

# Marta Novak

Staff Software Engineer at Ledgerly | Distributed systems, Java, Kafka

Ljubljana, Slovenia

## Summary

Backend engineer with thirteen years of experience, the last seven in payments. I design services that move money correctly under load: idempotent APIs, event-driven workflows and ledgers that can be audited. I care about clear architecture decisions written down for the next engineer, calm incident handling and growing the people around me. Currently leading the ledger platform team at Ledgerly.

## Experience

### Ledgerly

7 years 7 months

**Staff Software Engineer**

January 2022 - Present (4 years 10 months)

Ljubljana, Slovenia

- Led the design of the payment ledger platform in Java 17 and Spring Boot, processing 40 million entries a day.
- Moved settlement to an event-driven architecture on Kafka, with exactly-once processing and replayable topics.
- PostgreSQL partitioning and Redis caching cut p99 latency of balance reads from 180 ms to 25 ms.
- Internal services talk gRPC; public APIs are REST with OpenAPI contracts and idempotency keys.
- Runs on Kubernetes (EKS) on AWS, deployed with Helm; tracing with OpenTelemetry, dashboards in Prometheus and Grafana.
- Introduced architecture decision records for the platform and wrote 30 of the first 40.
- Mentor six engineers; lead incident reviews and the on-call rotation for the ledger.

**Senior Software Engineer**

April 2019 - December 2021 (2 years 9 months)

Ljubljana, Slovenia

- Split the payments monolith into twelve microservices along domain-driven design boundaries.
- Designed the REST APIs for merchants and partners; versioning and deprecation policy.
- Integration testing with Testcontainers; CI/CD with GitHub Actions, from 40-minute to 9-minute pipelines.

### Cargonet

**Software Engineer**

June 2015 - March 2019 (3 years 10 months)

Zagreb, Croatia

- Shipment tracking services in Java and Spring on MySQL, with RabbitMQ between services.
- Containerised the services with Docker and built the Jenkins pipelines that deployed them.
- Unit testing with JUnit and Mockito; took part in code reviews for a team of eight.

### Webcraft Agency

**Junior Web Developer**

September 2013 - May 2015 (1 year 9 months)

Ljubljana

Websites in PHP and JavaScript on MySQL, deployed to Linux servers; version control with Git.

## Education

### University of Ljubljana

Master of Science - MS, Computer and Information Science · (2011 - 2013)

### University of Ljubljana

Bachelor of Science - BS, Computer Science · (2008 - 2011)

## Honors-Awards

Ledgerly Engineering Excellence Award (2023)
Best talk, Java Days Ljubljana (2021)

## Publications

Moving a payments ledger to event sourcing (Ledgerly engineering blog, 2023)
Idempotency keys in practice (Java Days Ljubljana, 2021)
