Liam Ortega

Senior Full-Stack Engineer · Lisbon, Portugal · liam.ortega@example.com

Summary

Full-stack engineer with nine years of building web products end to end, from database schema to the last pixel. Most at home in TypeScript, React and Node.js; I like fast pages, accessible interfaces and tests that let a team ship on Fridays. Looking for a product team where engineers talk to users.

Experience

Senior Full-Stack Engineer — Brightdesk · Feb 2022 - Present
- Rebuilt the customer dashboard in TypeScript with React and Next.js; Node.js GraphQL API on PostgreSQL with Prisma.
- Led the design system: 60 components in Tailwind CSS, documented in Storybook, used by four teams.
- End-to-end tests with Playwright and unit tests with Vitest; flaky test rate under 1%.
- Accessibility audits against WCAG 2.2 AA; fixed keyboard navigation and contrast across the product.
- Web performance: Largest Contentful Paint from 3.8 s to 1.6 s (image pipeline, code splitting, caching).
- Feature flags for gradual rollouts; serverless jobs on AWS Lambda; Docker for local development.
- CI/CD in GitHub Actions with preview deployments for every pull request.

Full-Stack Developer — Shopwave · May 2019 - Jan 2022
- Storefront in Vue and Nuxt with server-side rendering; Express REST APIs on Node.js.
- MongoDB for the catalog, Redis for sessions and carts; JWT authentication and role-based authorization.
- Jest unit tests and Cypress component tests; two-week sprints in Scrum.

Web Developer — Freelance · Mar 2017 - Apr 2019
Responsive websites for small businesses in HTML, CSS and JavaScript; WordPress themes and plugins in PHP.

Projects

- Open-source maintainer of a small React date-range picker (1,200 GitHub stars), written in TypeScript.
- A VS Code extension that previews Tailwind CSS classes, built with Node.js.
