

Hakan Yilmaz

Senior Embedded Software Engineer · Ankara · hakan.yilmaz@example.com

Summary

Embedded engineer since 2013, from 8-bit microcontrollers to embedded Linux on defence and automotive hardware.

Experience

Senior Embedded Software Engineer — Aselkon Defence · Feb 2019 - Present

- Firmware in C and C++ for STM32 microcontrollers on FreeRTOS; CAN, SPI, I2C and UART drivers.
- Embedded Linux with Yocto for a radio product; board bring-up with oscilloscopes and logic analyzers.
- Unit tests with Unity and Ceedling; mentored four engineers; Git and Jenkins.

Embedded Software Engineer — Otomotiv Elektronik · Jul 2013 - Jan 2019

- ECU software in C on 8-bit and 16-bit microcontrollers; schematic reviews with the hardware team.
- Python tools for test benches and log analysis.

Education

Gazi University, B.Sc. Electrical and Electronics Engineering (2009 - 2013)
