Certifications

Google Cloud Professional
Machine Learning Engineer

Kerem Doğan

Staff Machine Learning Engineer | LLMs, Search, MLOps
Amsterdam, Netherlands

Summary

I build machine learning systems that ship: ranking, search and, lately, retrieval-augmented LLM products. I lead technical direction across teams, write design docs and ADRs, and mentor engineers. Regular speaker at PyData meetups.

Experience

Shopwise

8 years 9 months

Staff Machine Learning Engineer

May 2021 - Present (5 years 6 months)
Amsterdam

Technical lead for search and recommendations across four teams; wrote the architecture decision records for our ML platform and drove hiring for the applied science group. Built a retrieval-augmented generation assistant over product data: embeddings, a vector database (Qdrant), fine-tuned open models with LoRA, and an offline evaluation suite for answer quality. Served models with vLLM on Kubernetes (GKE); online A/B tests for every ranking change.

Senior Machine Learning Engineer

February 2018 - April 2021 (3 years 3 months)
Amsterdam

Learning-to-rank models in PyTorch and gradient boosting (scikit-learn, LightGBM) with feature engineering on Spark. ML pipelines in Kubeflow and Airflow, experiment tracking in MLflow, model monitoring for drift; Docker everywhere.

Datalyze

Data Scientist

September 2014 - January 2018 (3 years 5 months)
Istanbul

NLP for customer reviews (topic models, then deep learning with TensorFlow). Statistics and SQL for pricing analyses; distributed training of text models on AWS GPU instances.

Education

Boğaziçi University

Master of Science - MS, Computer Engineering (machine learning research) · (2012 - 2014)

Bilkent University

Bachelor of Science - BS, Computer Engineering · (2008 - 2012)
