Mert Yıldız

Senior Software Engineer | Java | Distributed Systems
İstanbul, Türkiye

Özet

Senior software engineer with six years in telecom billing and charging. I modernise legacy Java systems, care about observability and performance, and work closely with client stakeholders. On the side I build small LLM tools with Python and FastAPI and a Vue/TypeScript frontend.

Deneyim

Telkonet Systems

6 yıl 8 ay

Senior Software Engineer

Nisan 2024 - Halen (2 yıl 7 ay)

İstanbul, Türkiye

- Built an OpenTelemetry-based tracing library with context propagation across Kafka-based services.
- Sped up renewal workflows eight times with Hazelcast caching and batch processing.
- Developed modules of an event-driven online charging system handling 5,000 transactions per second.
- Took part in the on-call rotation and investigated production incidents.

Software Engineer

Mart 2020 - Mart 2024 (4 yıl 1 ay)

İstanbul, Türkiye

- Led the migration of two monolithic billing applications to Spring Boot microservices on Docker and Kubernetes, working with the client's project manager and stakeholders.
- Designed REST APIs and PostgreSQL schemas; moved reporting queries off Oracle.
- Wrote unit and integration tests with JUnit and Testcontainers; pipelines in Jenkins; Redis for sessions.
- Reviewed code and onboarded two new engineers.
